

Pay for Success Design Team

Feasibility study working takes place through phone calls, face-to-face meetings, and larger group gatherings. The team members for these meetings should be determined based on your community. It may be useful to agree up front the contribution of team members to these calls/meetings, as well as their wider roles in the project.

Design team

The design team is responsible for the day-to-day feasibility work, including:

- Negotiating access to local healthcare, jail or other data relevant for the populations
- Analyzing local data to determine target population characteristics
- Determining potential sources of support for service funding and housing vouchers
- Determining potential sources of success payments for outcomes achieved (end payers)
- Developing a service model and budget in collaboration with service providers
- Liaising with decision making authorities who will commission, fund or pay for service outcomes

All core team members will be asked to attend a weekly update call to discuss progress and next steps during the feasibility stage. Please complete the boxes below with your design team members.
