

Pay for Success Leadership Team

Feasibility study working takes place through phone calls, face-to-face meetings, and larger group gatherings. The team members for these meetings should be determined based on your community. It may be useful to agree up front the contribution of team members to these calls/meetings, as well as their wider roles in the project.

Leadership team

The leadership team is the group of stakeholders aiming to commission, fund, or deliver the intervention. The leadership team should be updated on major milestones (e.g. completion of the cost/benefit analysis, decision to fund or commission the service) through meetings every two or three months.

We have found it invaluable to update the leadership of project development and ensure they are on board when the feasibility is completed and a service is ready to start! This team can also include any other 'community champions' for Pay for Success.
