

# 2017 Williams Class Members' Housing and Services -Consumer Satisfaction Survey

As Administered and Analyzed by CSH for the Illinois Department of Human Services - Division of Mental Health

> John Fallon 12/4/2017

Q56: The Subsidy program really is important to me in getting and keeping my apartment.

91.4% of Subsidy recipients to the annual survey agree that the Bridge Subsidy was important to Class Members in getting and keeping their apartment.

### Highlights of the survey:

- 1. The survey appears to be representative of the population currently being served and engaged with their treatment teams during the months of the survey. This means that there are members not surveyed who are more independent and living on their own without support as well as individuals not doing well who have returned to the nursing home, left the program, passed away, or are refusing to engage with their treatment team. (See survey limitations page 14)
- 2. 91.4% of tenants said that the Subsidy is really important to Class Members in getting and keeping their apartment. Q56
- 3. There were 768 surveys returned. That is 68% of the individuals currently in the community working with their original treatment team. Q1 Pg18
- 4. The average length of community stay for the residents is 2.375 years in the community. There is a good cross-section of individuals receiving support who have lived in the community from 1 month till 6 years. There is a bell curve to the frequency. Q1 Pt 3 Pg19
- 5. Residents now live in <u>9 different counties and 49 cities</u>. The residents <u>in Chicago now live in 36 different zip codes</u>. The Division of Mental Health has expanded the options of drop-in centers for support into more areas over the past several years.
- 6. The surveys include responses from all of the IMDs including more than 35 responses each from two of the locked facilities.
- 7. Whereas early surveys had a large number of handwritten answers that showed evidence of symptomatic and disorganized thought, this set of surveys shows a much smaller set of answers that reflect this level of difficulty expressing themselves. Instead, almost all of the surveys reflect concerns of ordinary individuals living in the community in a rental unit. There are concerns about other neighbors, neighborhood crime, and have additional money.
- 8. 89.44% of people live in their own apartment. 82.5% of individuals do not want a room-mate. This is a slight increase in the number of people who might consider a room-mate. Pg24
- 9. 83.7% of people feel safe in their neighborhood now (Q7 Pg24). 85.36% feel safe in their building (Q8) and 85.77% feel their building is clean and well kept (Q9). 67% have never had bedbugs as a problem.

- 10. 76.99% of people are living in the neighborhood they originally wanted (Q16) and 83.77% (Q17) are happy with where they are living now. 9% disagree that they are not happy with their neighborhood right now.
- 11. Despite the larger number of places where people are living, 38.11% still want to live on the north side of Chicago and 20.14% hope for the northern suburbs. There remains the greatest demand for people to live in the areas where they have the most experience. The Uptown area and Rogers Park have long been areas where people leaving the state psychiatric services have settled and where the most experienced providers of support have been located.
- 12. Individuals like their apartments, their furnishings, and are generally very appreciative of both the staff and the program.
- 13. 59% of people say that they are interacting with other people outside of the program (Q28) and 87.72% get along with people and interact with others in their building. 51.8% said they were interacting with others in 2015.
- 14. 65% of people use the drop-in centers and they are becoming more important as a connecting center for the mental health community as they have grown.
- 15. Service visits and phone calls are occurring at individual apartments. The visits and calls are occurring at a rate that matches what Class Members are asking for. Class Members are very satisfied and appreciative of the support of each of their programs. That is reflected throughout the survey.
- 16. As for employment and volunteer work, 80.87% of Class Members know who to ask for help in obtaining employment or volunteer work. 33.62% of Class Members say they would like to work or volunteer more hours and 23.38% are not sure. 73.83% are not employed right now. 68.32% are not involved in volunteering.
- 17. 49.86% said they did not know about the CRSS program (working as a peer aide).
- 18. Many residents in the public forums and the survey mention the Peer Ambassador Program as important in convincing residents to move and as a good first work experience.

### <u>Direct Quotes and Comments</u> from Class Members (Q57):

- 1. "I am grateful that I have this opportunity to live independently, go to school and work while having a place to come back to. Thank You!"
- 2. "Everything is going very, very good! No problems, questions, or concerns! Truly grateful for all services provided for me!
- 3. I am happy that there was a Rauner vs. Quinn Consent Decree Program that helped me to get out of there."
- 4. "I am now in CHA with a Housing Choice Voucher and am happy with my apartment. Transition was easy. I am now trying to get new furniture & employment."
- 5. "I am self-sufficient. I have a checking acct now and past. I can manage me + SS and pay bills out of my acct - this is important."
- 6. "I appreciate the Bridge Subsidy and I am very grateful for the help. I am pleased for all the services I have been able to get and didn't have access to before."
- 7. "I feel the "Moving On" program has helped me to succeed in my long-term goals and am looking forward to moving out of the program to a more outpatient care program at my location soon."
- 8. "I feel this is a great program. I was not in need of all the help offered because I was capable of doing it myself. Grateful for the help I did and still am receiving."
- 9. "I have successfully transition to CHA and I'm very happy."
- 10. "I hope they will continue to help more people out into the community. They have been helpful with my transition and has given me hope that I can stay in the community."
- 11. "Thank you for everything! I strongly love my apartment. If it wasn't for you guys, I wouldn't have made it without your help."
- 12. "This subsidy has been a God send. 3 years ago I never imagined that I'd be living and on my own. SSI is helpful but this subsidy is the cherry on top of the sundae that is mental health assistance."

## **Section 1:**

## Introduction & Methods Section

**Introduction**: The Illinois Department of Human Services Division of Mental Health, as a part of its implementation of the Williams Consent Decree, has elected to administer a Consumer Satisfaction Survey for the Permanent Supportive Housing. The goal is to evaluate how well the supportive housing options and the Moving On program is working for those Class Members receiving services. As a contracted entity with IDHS DMH, CSH was asked to design, deliver, disseminate, and summarize this survey of those Williams Class Members receiving a Bridge Rental Subsidy and living in community-based housing because of the Williams Consent Decree.

**Survey Design:** CSH began the survey design process in February of 2017. CSH designed this survey based on model surveys of housing satisfaction already in use across the country and in Illinois. The survey added questions that were meant to solicit specific elements of clinical support and permanent housing offered to the Williams Class Members. This year's survey asked questions about volunteer and paid vocational opportunities to encourage DMH Initiatives about offering additional vocational support. In addition to the regular review process, this year's survey also received an additional round of editing by Support Team staff and Peers. Finally, the survey was reviewed with DMH staff one question at a time with an attempt to make sure the question elicited the information that was sought. In constructing the survey, the questions were designed to make sure that the following elements of the intervention was included for each class member and to verify that this element of the consent decree was important for the success of the class member.

The detailed explanation of the elements of the intervention includes:

- 1. <u>Affordable Housing</u> Tenants have rental assistance to close the gap between the full rent and what 30-35% of their monthly income can afford in the community
- 2. <u>Standard Lease</u> A legal lease that states the rights and responsibilities of tenancy, that is the same as tenants not accessing rental assistance and/or services
- 3. <u>Housing Choice</u> –Class Members can choose if they want to live alone or with a roommate and if so, who is the roommate. When available, Class Members are offered the type of housing scattered in the community or in a building with other affordable housing renters who may or may not have disabilities.
- 4. <u>Neighborhood Choice</u> Class Members are asked where they would like to live and shown more than one option, if needed, of apartments that are available.
- 5. <u>Community Integration</u> Class Members are acquainted with their community amenities and assisted as needed with getting to know their new neighborhoods and establishing connections.
- 6. <u>Home Furnishings</u> An appropriate level of start-up Transition Assistance Funds (\$2,800) are provided to secure the unit (security deposit and utility connections non arrearages) and pay to furnish the apartment in an appropriate way that allows that tenant sufficient choice and control.
- Team Based Clinical Mental Health and Medical Services Each Class Member is
  assigned a multi-disciplinary team which takes the lead in providing the voluntary
  clinical behavioral health support, medical assistance, and the required levels of

housing case management that is needed to allow that individual to live in their own apartment. Intensive Case management services and medical support are delivered in the home and elsewhere as needed and requested by the tenant in a manner that allows that tenant access to services in a way that meets their needs. The voluntary services are directed by the consumer and focused on housing stability. Class Members have choice regarding the acceptance of medication and services.

8. <u>Community Drop-In Centers</u> - Drop-In Centers are offered for Class Members as a place for socialization and friendships as they integrate into the larger community. This is to help address issues of loneliness and isolation that have been identified as a need by consumers.

Prior to distribution, the survey was tested with four tenants at two agencies who felt the questions were understandable and appropriate. The survey was approved by IDHS DMH in July of 2017 and distributed till Mid-September of 2017.

**Survey Administration**: After discussion with Williams Class Member support teams, the decision was made to distribute the survey to identified Williams Quality Administrators (WQA) at each agency. The WQAs were each trained on how the survey was to be distributed. WQAs then trained and delivered the surveys within their individual agency through Assertive Community Treatment or Community Support Team Leaders. The WQA staff helped determine the numbers of Class Members who were transitioned to the Bridge Subsidy per ACT or CST Team as of March 1, 2017. This established the number of expected surveys to be administered. A goal had been set to achieve an 80% or higher return rate for each team.

#### **Confidentiality Measures**

Each ACT or CST team was assigned a number and then was asked to label each survey with a team number and survey number. At no time did CSH know the identity of the survey respondents which would allow the surveys to remain free of any identification or concern of confidential information. Each survey was marked with a statement telling Class Members not to list their name and a promise that treatment staff would not have their survey numbers to track individual comments.

Most teams provided their survey respondents with an envelope when the survey was distributed in paper form. An online option was also offered but most teams provided Class Members with paper forms based on request. It is acknowledged based on feedback from ACT and CST staff that Class Members in some cases did ask for help in filling out some parts of the survey.

**Survey Response and Limitations**: The initial survey period was from June 15, 2017 to Sept 15, 2017. The result was the return of 788 surveys out of potential 1,164 surveys distributed to those persons who had transitioned into the community at that time, or a 68% response rate.

The 1,164 persons for whom the survey was attempted to be distributed did not include individuals who had made an initial transition to the community but had returned to the nursing home, passed away, or had otherwise left the Bridge Subsidy program. Some additional Class Members voluntarily "graduated" from their support teams and are living successfully in their own apartment on their own. The survey appears to be representative of the population currently being served and engaged with their treatment teams during the months of the survey. This means that there are members not surveyed who are more independent and living on their own without support as well as individuals not doing well who have returned to the nursing home or are refusing to engage with their treatment team. This can skew the results of the overall Moving On Initiative's results. There was an attempt to gather as many surveys as possible and the Division has several previous surveys that have produced very similar results.

As to this year, 1,164 was the number of Class Members identified by the treatment teams as currently being served on the ACT or CST teams and currently transitioned into the community. After identifying that number (1,164), the surveys were distributed to the teams and the team leaders with instructions to distribute the surveys to all of their members. There are shifts between teams and new residents entering onto teams. That may allow some teams to grow or shrink from the time the residents are initially tabulated and when the survey is distributed and administered. This helps explain how a team may have more than 100% of surveys returned.

Included in this report is a list of each of the Williams Transition Agencies involved in the survey administration, and the response rate per team. Out of teams with Williams' Class Members, one large team had an extremely low response rate (the initial C4 Team). Otherwise, the sample is likely still fairly representative of the entire class in housing served by these teams.

**Survey Results:** The survey results are divided into three sections. The first section includes aggregate results of all teams for each question. Open ended comments by Class Members are included (in their entirety) for each question except when the response was "none", "no response", "no comment", or other acknowledgements by the class member that they were not adding input for a particular question. While a response was not required for every question, some respondents responded to each question even to say that they had no response. Each question also lists how many responses were made to every question and how many Class Members skipped a question.

Generally, the survey reflects a very broad level of Class Members' satisfaction with their apartments and an acceptance of their new communities. As compared to last year, the comments reflect a more confident group with broad changes in how they use their support system. More Class Members have now met and interact with their neighbors. Class Members seem to better manage their symptoms if their written answers are an indication. Answers were clearer, more rational, and less angry at how they perceived their treatment in the nursing home.

While there were some negative comments, almost all the people who responded to the survey liked their apartment, felt it was relatively safe (some were afraid), and liked the neighborhood they were living in.

## Charts, Multiple Choice Questions, and Demographics

## Question 1: Who is Your Support Agency and Team? (These are the surveys that were returned for each of the Teams):

Here are the number of surveys returned by each Agency and team in 2017. Each agency provided CSH with the number of individuals they were serving in March 2017 and then asked and offered each Class Members a chance to respond to a 57-question survey either in paper form or on the web. During the intervening time between March and September of 2017 when the survey period was open, Agencies may have transferred individuals between teams or added new Class Members. This may allow a team to turn in more than 100% of the numbers identified in March. (next 5 pages)

#### Question 1: Part 3 – How many years have you lived in the community?

Each Class Member surveyed was asked to list how long they have lived in the community. Quality Administrators were asked to assist the class member in determining the length of time they have been in the community. These are self-reports and some of these lengths might be inaccurate. This includes 597 responses and an average length reported of 2.375 years.

**Question 2: Where do you live? - Zip Codes by County:** Increasingly, the Class Members are spreading out in the areas as they settle, although most individuals choose to live near where they lived in the IMD. Chicago is still the most popular with the largest number of Class Members asking to live on the north side in Rogers Park and Uptown. These are also rapidly gentrifying parts of the City that are losing many of their most affordable properties to new development.

| I noticed how caseworkers limited neighborhood choices  |  |
| I recommend they check at the bed bug situation first.  |  |
| I think stores, churches, recliners, theaters, library, ponds, swimming pools indoor and outdoor. I think we need a conservatory indoor and outdoor. I think we need space for events indoor and outdoor like a carnival. I think we need parks indoor and outdoor. I think we need more kinds of museums. I think checking out your neighborhood. I think meeting your neighbors. I think meeting your landlords. I think making more than more than one visit to inspect the apartment as soon as possible. I think we need arrangements for non smokers. |  |
| I think that they should have more areas to live in that are nice and safe  |  |
| It was a good job already   |  |

#### Response

A program to help ppl learn to drive and get their license would be wonder full Can individuals attend Resident Member council meetings via Skype?

Everything is going very, very good! No problems, questions, or concerns! Truly grateful for all services provided for me!

Everything is good

I am grateful for this program. Without it, I don't know where I'd be.

I am grateful that I have this opportunity to live independent. Go to school and work while having a place to come back to. Thank You.

I am grateful to have all meals here.

I am happy that there was a Williams Quinn Program that helped me to get out of there

I am now in CHA w/ a housing Cha voucher & happy with it. Transition was easy. I am now trying to get new furniture & employment.

I am self-sufficient. I have a checking acct now and past. I can manage me + SS and pay bills out of my acct - this is important.

I am so thankful for thresholds and their help with moving me out. I get a second chance and I feel really good about the support I have.

I am thankful for the chance to move into the community. My team has been very supportive with my move.

I am very happy with my case manager I am very interested in finding a nice apartment.

## I am very satisfied

I appreciate the Bridge Subsidy and I am very grateful for the help. I am pleased for all the services I have been able to get and didn't have access to before.

I could not afford decent housing without this subsidy. Thank you very much!!

I don't qualify for the Bridge subsidy program and have been left to pay it by myself.

I don't think I would be where I am without the Bridge Subsidy Program Thanks

## I enjoy everything

I feel the moving on program has helped me to succeed in my long term goals and am looking forward to moving out of the program to a more outpatient care program at my location soon.

I feel this is a great program. I was not in need of all the help offered because I was capable of doing it myself. Grateful for the help I did and still am receiving.

## I have my apartment

I have Section 8 now.

I have successfully transition to CHA and I'm very happy

I hope they will continue to help more people out into the community. They have been helpful with my transition and has given me hope that I can stay in the community.

I need my bridge subsidy back and help with finding a new apartment

I really enjoy the men and women at the agency, they treat me fairly and with respect. I hope to continue working with them.

I sincerely appreciate the program that has allowed me to exist back into he community. A Blessing from God!

I think everyone is doing a great job and really helping me.

I want my subsidy again to get an apartment.

I was important for me to move out now that I have it It's not that important.

I wish the bridge subsidy continued to assist me with my housing like they did before. I will have to work more hours in order to cover all of the expenses. I worry about my financial situation especially moving into a new area.

I would like a 2nd chance for getting a subsidy to move from the group home.

I would like assistance obtaining another apartment & maintain it.

I would like to get more information about subsided housing vouchers in the future. The previous transition coordinators do not have the needed information but they have to ask someone else to get an answer which took a long time. The staff members should have all the needed information to report to the clients.

I would like to have more information on the subsidy and moving into other apartments.

I would like to keep my subsidy and keep see my doctor and case manager + team

If possible do not have landlords charge a onetime fee for A/C use during the summer months.

I'm happy living independently
I'm thankful for this program. They gave me a chance.

It has been helpful for me.

Keep everything going how I want it to go.

My team helps me a lot, thank you.

No comment other than, I'm happy for being in my apartment

Sometimes I get fearful that the assistance will go away.

thank you for all the help you have given me

Thank you for everything! I am glad to have this p.m.!

Thank you for everything! I strongly love my apartment. If it wasn't for you guys, I wouldn't have made it without your help.

Thank you I'm very appreciative for getting help with the rent for my apartment. Best thing that has happened to me since coming back to Chicago from being gone from here for over 30 years.

Thank you this is good enough

Thank you.

Thankful for the bridge subsidy for keeping myself and my wife housed throughout this time until we can see another subsidy b/c we were denied for Section 8.

Thanks for all the help and support to getting back to the place I grew up in.

The Bridge Subsidy pgm has been very important and helpful to me in getting + maintaining my apartment.

The staff is excellent would not change anything.

The William Consent Decree is the Best thing that ever happened to me!

This is a very good housing complex and apartment

This subsidy has been a God send. 3 years ago I never imagined that I'd be living and on my own. SSI is helpful but this subsidy is the cherry on top of the sundae that is mental health assistance.

well I'm very thankful for your help and again don't how much to thank you thank you

# **Illinois Division of Mental Health Housing Survey and Focus Forums**

# **Dear Moving-On Class Member,**

Attached to this cover letter is the Annual Housing Survey. If you have completed this before we hope that you will agree to complete it again. If this is your first time, we welcome your feedback. The information gathered from this survey is very important to the State, as we want to best meet your needs and needs of others who transition from nursing home settings.

We greatly appreciate your effort in filling out the survey and returning it by the designated date.

Also, you are cordially invited to attend one of the Moving-On Focus Forums. The dates, times and locations are listed below. The State of Illinois appreciates your feedback on how this program has worked for you and how has it benefited or changed your quality of life.

These Focus Forums will be videotaped, with both group and individual sessions, and the results will be edited and provided to the Illinois DHS/Division of Mental Health.
