

Data Sharing to End Homelessness – Challenges and Solutions

Corporation for Supportive Housing + American Public Human Services Association

Presenters

KIM KEATON

Director of Data and Analytics

Corporation for Supportive Housing (CSH)

MATTHEW LYONS

Director, Policy & Research

American Public Human Services Association (APHSA)

JESSIE METCALF

Homelessness Initiatives Lead, U.S. State and Local Government

Amazon Web Services (AWS)

Panelists

MARLA SUTHERLAND

Housing First Services Director at Homeward Alliance

City of Fort Collins

ERIN DALTON

Deputy Director, Department of Human Services

Allegheny County, Pennsylvania

Agenda

1. Objectives
2. Trends in Homeless Data and Sharing
3. Community Examples
 1. City of Fort Collins
 2. Allegheny County, PA
4. Panel Discussion
5. Questions and Answers

Learning Objectives

1. Learn about homeless services data and how integration can help achieve better outcomes in ending homelessness
2. Learn key strategies and use cases from communities that have successfully shared data
3. Generate a sense of excitement about using homeless data to improve the cornerstone of stability of people's lives – housing stability

Survey Reminder

We will distribute a brief survey to attendees after today's webinar to get your feedback on the information and resources you need to scale up data sharing between homelessness and human services systems.

Social Determinants of Health
Substance Use Disorder and Behavioral Health
Data Optimization and Interoperability
Culture of Analytics
Evidence-based Policymaking

Six Key Levers

Each lever must be pulled through a race equity lens

ADVANCING HOUSING SOLUTIONS THAT

Improve lives of
vulnerable people

Maximize public resources

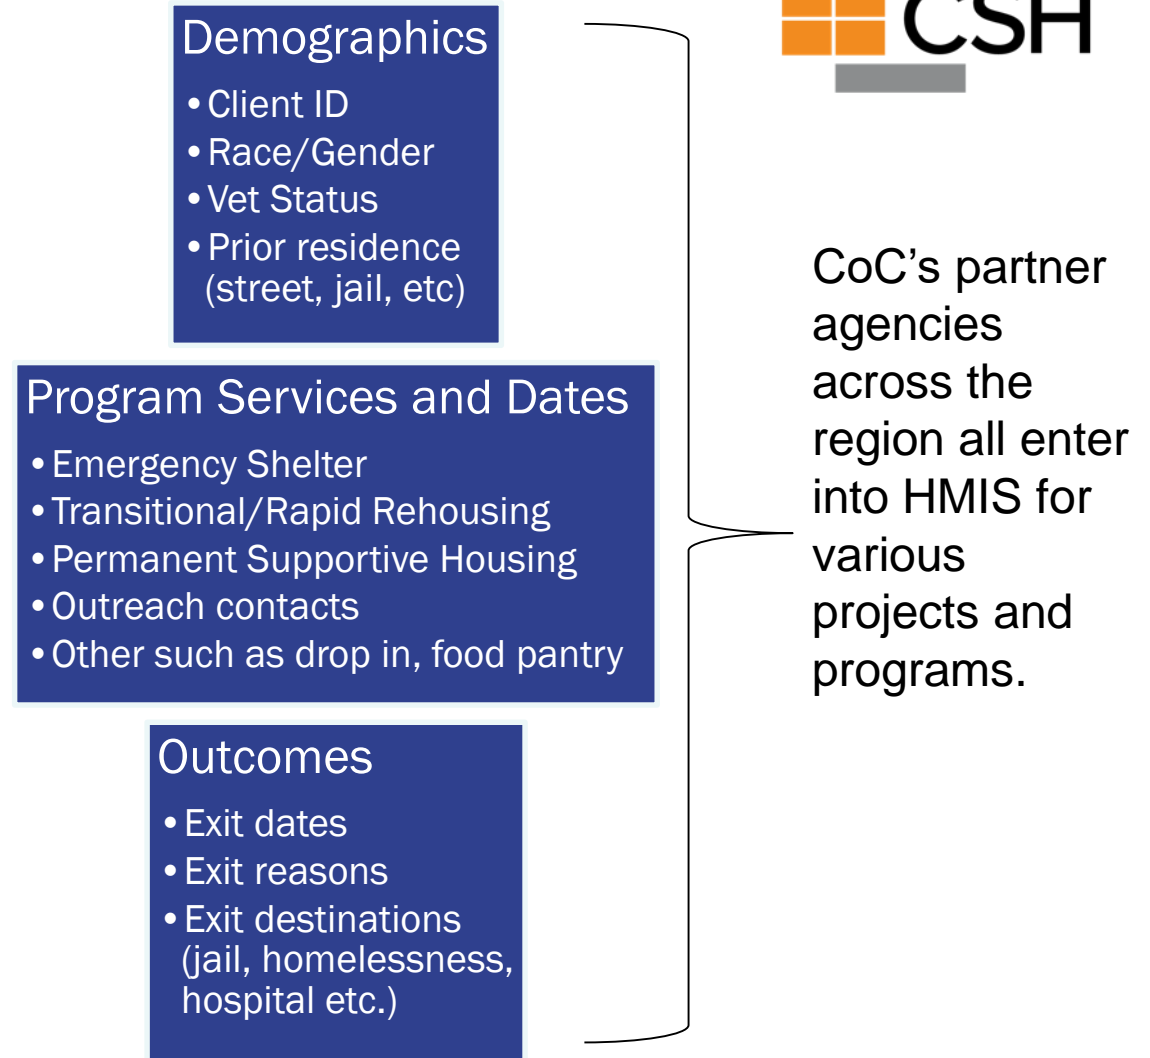

Build strong,
healthy communities

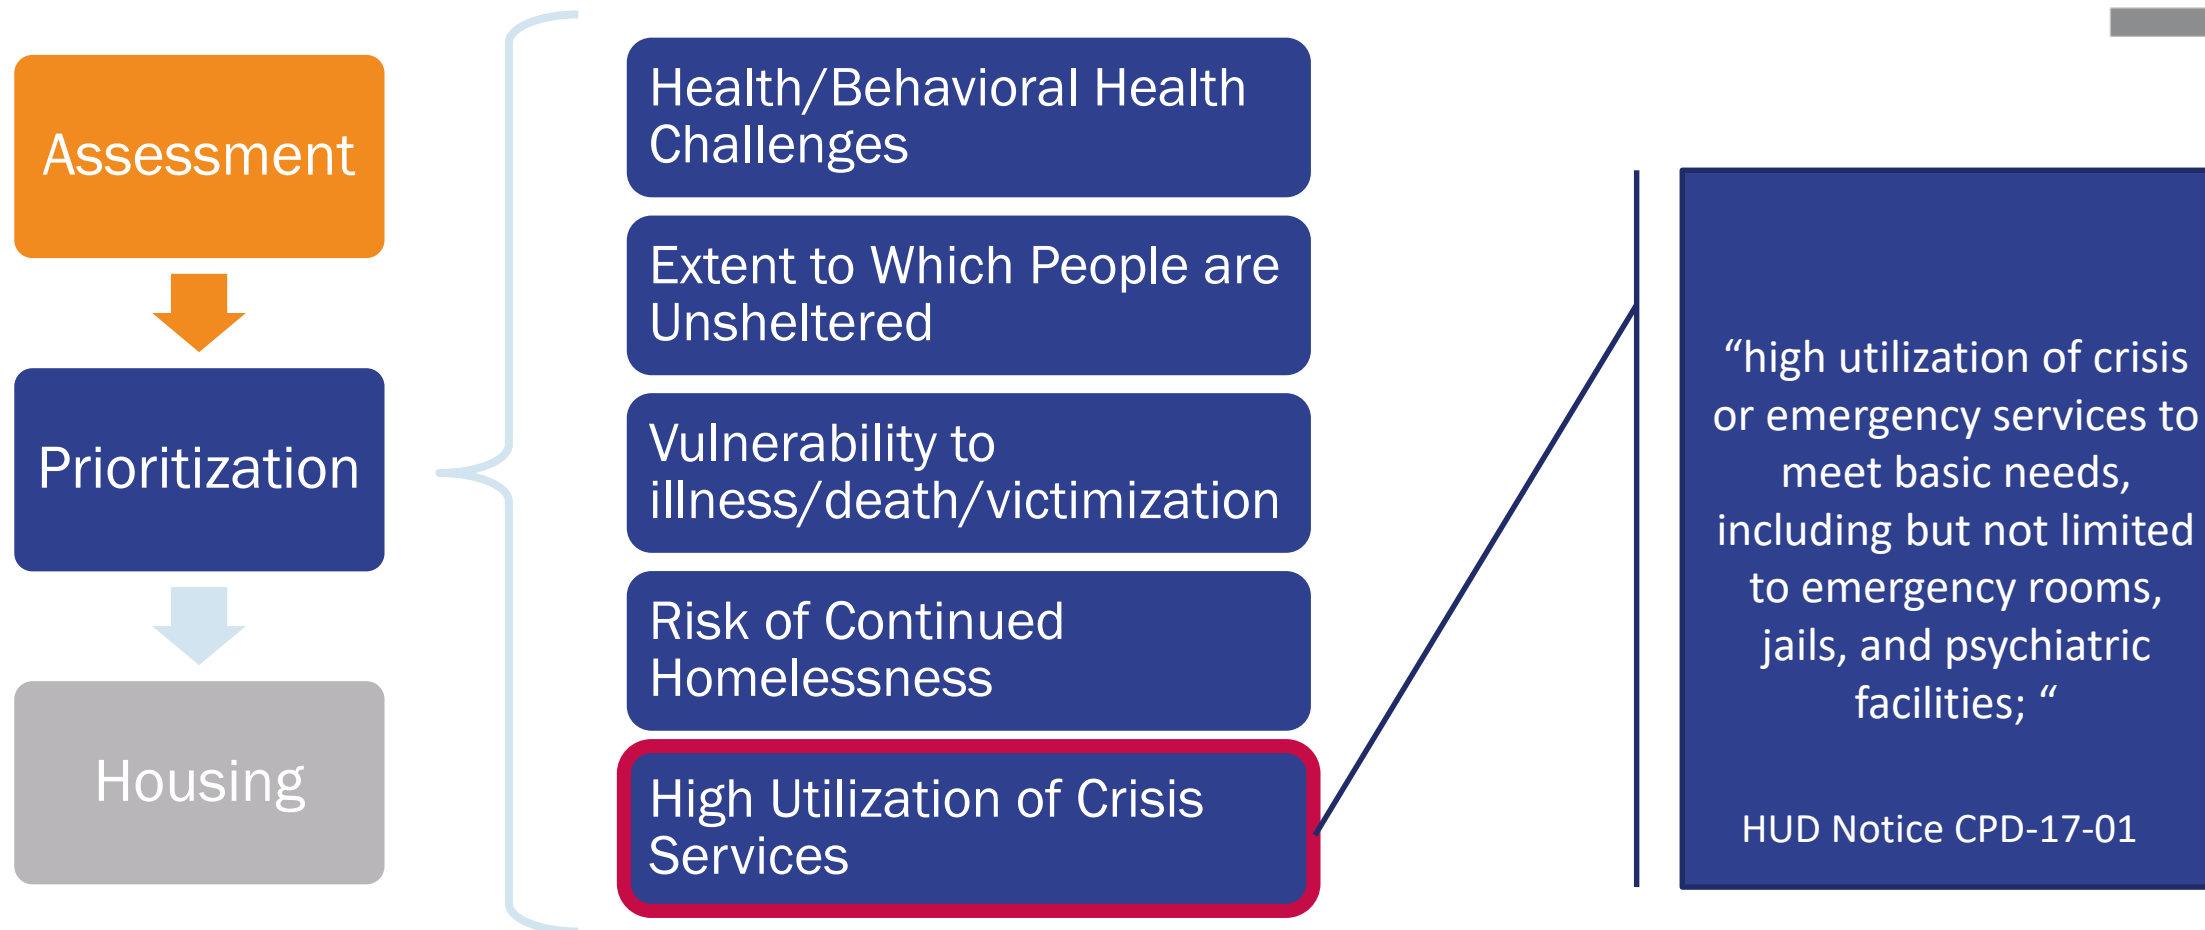

Homeless Services Data: What is it? What's in it?

- Homeless Management Information Systems – HMIS
- Each Continuum of Care funded by HUD is comprised of homeless service provider through out a region
 - County
 - City
 - Multi-county/Balance of State
 - State
- Each CoC must have a HMIS system and designated lead

Motivation: HUD Guidance for Coordinated Entry

The Opportunity Across Human Services

Data is the secret sauce that can bring these partners together!

HMIS Data Matching and Exchange Types

One time matches

- Good first step if data is very siloed
- Useful for examining system overlap
- Helps determine target population for a small pilot program
- Best to plan for repeated matching beyond one time exploratory match

Repeated data matching

- Provides a set up for potential scaling up of intervention
- Acclimates unfamiliar systems to one another
- Practice makes perfect! Opportunity to work through technical, privacy-related, and logistical issues

System integration

- Data permanently flows from one system to another in back end technical arrangement (API, bridge)
- People/families can be identified on a rolling basis as people “grow into” eligibility depending on eligibility factors
- Provides opportunity to use data for other use cases, care coordination, further systems change

Real time multi-system data exchange

- Can be local, county, statewide, or other geographic framework
- High-cost clients are more likely to be served in multiple delivery systems
- More costly, time-consuming, and requires/assumes technological infrastructure
- Requires significant leadership

Lower tech

Medium tech

High tech

Community Example

Opening Doors through Data

Marla Sutherland
Homeward Alliance's Housing First Services
Director
970-541-9719
marla@homewardalliance.org

Homeward2020

Collaborative, strategic think-tank guiding implementation of Fort Collins' 10-Year Plan to Make Homelessness Rare, Short-Lived and Non-Recurring by setting priorities, developing alignment and action plans, and suggesting policy

Homeward Alliance

Operates a continuum of programs and initiatives, ranging from critical survival gear, to employment services, to homelessness prevention

Actionable Data

- Point In Time count
- Murphy Center = *the hub of services for people who face homelessness or housing instability—one location in which 20 organizations offer more than 40 services to nearly 3,000 people each year*

Collaboration

- Eliminate silos
- Participation in CoC and Coordinated Assessment and Housing Placement System (CAHPS)
- Build upon existing infrastructure

Housing First Services

- Offer intensive case management for housing navigation and housing retention
- Leverage existing services (non-duplication) to fill in systemic gaps

HFI: Interactive Data Dashboard

Population Dashboard

<http://www.homeward2020.org/population-dashboard/>

Housing First Initiative: Addressing Long-Term Homelessness in Fort Collins

Housing First Initiative (HFI) seeks to produce actionable and accessible community-level data on the issue of homelessness. With that data, we can better identify and implement solutions for people experiencing homelessness. HFI collects and reports data on persons experiencing homelessness in Fort Collins for six months or longer, pilots housing first solutions through local partnerships, and provides intensive case management to transition participants from homelessness to housing. *This dashboard does not provide data on all persons experiencing homelessness, but focuses on individuals experiencing chronic and long-term homelessness.

Current # of persons experiencing homelessness 6 months or longer in Fort Collins: 434

Business Partner Agreements

Universal Release of Information

Data Use Agreements

Challenges

- Buy-In from local agencies to participate in HMIS
- CSH's Data Matching Tool required more technical support and staff capacity
- Minimal Staff Capacity/Expertise for Data Analysis and Reporting

Resolution

Homeward Alliance will be the HMIS lead agency in our region

- Access to federal funding
- Ability to maintain customization of data and reporting outcomes
- Local technical support

Child Welfare

Jail

Courts

Probation

**Juvenile
Probation**

**Assisted
Housing**

**Behavioral
Health**

**322 predictors for each individual
receiving a score**

+ 642 household-level predictors
aggregated across:
all adults on the household
all children on the household

*Addition of actuarial assessment
(VI-SPDAT) responses was also
tested

INPUTS

Client History (admin data)

- Homelessness services
- Child welfare
- Behavioral Health (Medicaid funded)
- Assisted Housing
- Court Activity
- Aging Services
- County Jail
- Juvenile Probation
- Independent Living
- Prescription Medication

PREDICTED OUTCOMES

We built a PRM tool for a variety of outcomes 6 or 12 months after the call to the hotline

- Booking in County Jail
- Substance use diagnosis
- Inpatient Mental Health stay
- Emergency Department encounter

MODELING METHODS

We compared four modeling methods

- Logistic Regression
- Random Forest
- XGBoost
- LASSO

Current Assessment Vs Predictive Risk Model

VI-SPDAT SCORE

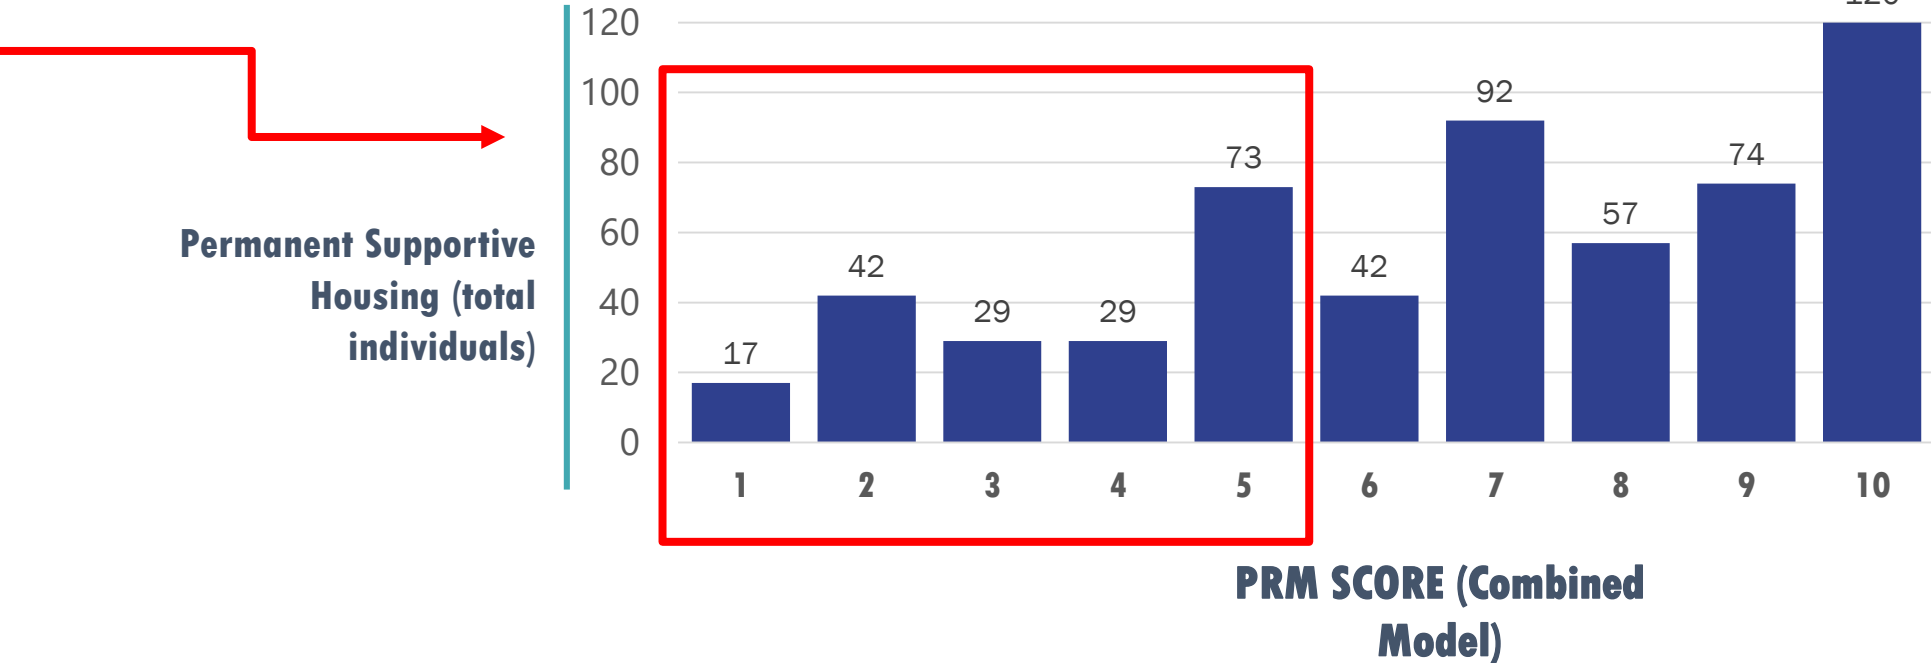

PREDICTIVE RISK MODEL SCORE

- Mental Health Inpatient 12 mo
- Mental Health Inpatient 6 mo
- Jail Booking 6mo
- Jail Booking 12mo
- Substance Use Svc 6mo
- Substance Use Svc 12mo

Current Assessment Vs Predictive Risk Model

33% of permanent supportive housing beds are given to individuals with a PRM score of 5 or less

Permanent Supportive Housing Works Better for Higher Risk Clients

High Risk Groups who received PSH/RRH/Transitional had lower rates of harm

Low Risk Groups who received PSH/RRH/Transitional had (slightly) higher rates of harm

Enablers

- Government
- Integrated Department
- Long-term Leadership
- Investment in Tech, Analytics & Innovation
- Community Support
- Willingness to take risks to benefit clients

Opioid-Related Overdose Deaths In Allegheny County, 2015-2016 Update

Opioid-Related Overdose Deaths in Allegheny County: Report and Data Visualizations

Allegheny County is experiencing opioid-related overdose rates higher than in the state and in the U.S. In 2016, 93 percent of overdose deaths in the County were opioid-related and 2016 represented the third consecutive year in which the number of fatal overdoses was higher than in any prior year. An increase in the presence of

SURVEY OF FAMILIES USING HOMELESSNESS CASE MANAGEMENT PROGRAM FINDS SATISFACTION — AND PREFERENCE FOR TEXTING AS A SURVEY METHOD

TAGS: client perspective, homelessness

The Homeless Services and Supports Coordination (HSSC) program, implemented by the Allegheny County Department of Human Services in 2013, provides comprehensive service coordination for families who use emergency homeless shelters. Upon entering an emergency shelter, participants meet with service coordinators who offer a range of assistance, from accessing public benefits to finding affordable housing, childcare ...

ALLEGHENY COUNTY 2018 POINT-IN-TIME HOMELESSNESS: DATA BRIEF

TAGS: homelessness

Each year, Allegheny County participates in a national effort required by the U.S. Department of Housing and Urban Development (HUD) to count the number of people who were homeless on a single night in January. Although not required by HUD, Allegheny County also conducts a summer point-in-time (PIT) count to better understand warm weather trends. ...

CLIENTS USING ALLEGHENY COUNTY HOMELESSNESS PROGRAMS: INTERACTIVE DASHBOARD

Thriving Communities Built on Human Potential

WWW.APHSA.ORG @APHSA1

Frequent Utilizers of Homeless Services

FREQUENT UTILIZER DEFINED AS THOSE WHO ACCESSED A SHELTER IN 2016-17, AND HAD 8+ TOTAL STAY INSTANCES

	Overall	Top 4.2% Client
Client	4,479	144
Person-Beds-Days	245,768	27,343 (10%)
Average Total Day Beds	55	190

Homeless Shelter Frequent Utilizers

Frequent utilizers significantly more likely to be male (91% vs. 59%)

Frequent utilizers slightly more likely to be African Americans (63% vs. 59%)

Frequent Utilizers typically older than non-frequent utilizers and have interesting age distribution (median age 54 vs. 37)

Homeless Shelter Frequent Utilizers

- In terms of service utilization, frequent utilizers and non-frequent utilizers are not very different.
- In general, people who use ANY emergency shelter have high rates of service utilization in mental health crisis and emergency room visits, but there doesn't appear to be large differences by frequent utilization
- Frequent utilizers have higher rates of jail bookings than non-frequent utilizers but not of arrests

	1 Year Before					1 Year After			
	<8	8+	Overall	Ratio		<8	8+	Overall	Ratio
Child welfare parent	7%	4%	6%	0.6		9%	7%	9%	0.8
