Topic: Principles of Motivational Interviewing (Core Course)

Trainer: Andrea White

Time: October 3, 10:00 am – 12:00 pm

Description: Case managers are skilled in connecting supportive housing tenants with the resources and opportunities available in their communities. Yet tenants who are most in need of case management services are often the most reluctant or wary about accepting these services. Case managers can use Motivational Interviewing (MI) to improve tenant engagement and motivation to work toward their self-identified service plan goals. MI, developed by Miller and Rollnick (1991), is based on the idea that people are most likely to change when the motivation comes from within themselves, rather than being imposed from the outside and gives the case manager a base to help tenants work through ambivalence. Workshop participants will learn to use MI principles and philosophy to enhance the motivation of supportive housing tenants.
